### What's New In?

Effortlessly incorporate your feedback and changes in only a few seconds with Autodesk® AutoCAD® MEP™'s Markup Assist and Markup Import. The most commonly used tools to import customer and supplier feedback, these features help you import feedback from a project's approval process such as sign-offs, drawing changes, and comments, and send those updates to a project or your current drawing. In addition, you can view and compare engineering drawings to your physical drawings, along with your existing documentation, with One-Click Document Comparison (video: 1:09 min.). From that easy-to-use interface, you can synchronize your changes, make comments, or send drawings to different users. Finally, you can even embed existing layouts and views into the drawings to speed up the project's deployment. Open InvisiGlue (video: 2:20 min.): Use this new feature to quickly add a clickable thumbnail that you can use to refer to an entire component or section of your drawing in a few clicks. ColorSwap (video: 2:12 min.): Use ColorSwap to quickly swap a color from one drawing to another without redrawing any part of the drawing or creating additional constraints or edits to the geometry. Clipboard from Inventor (video: 2:11 min.): This new, easy-to-use feature lets you access all of your registered drawings on the cloud-based Inventor platform. From there, you can use built-in CAD tools to open, edit, and work with them using native Inventor interfaces. Vectorization of 3D Models (video: 2:11 min.): It is now faster to draft and construct 3D models in any CAD program, including your Inventor® models. AutoCAD's improved vectorization pipeline means you can expect to see quicker model sizes and create faster model surfaces. All-New Drafting Environment (video: 2:08 min.): With new and updated tools, libraries, and palettes, you can more easily share and export designs, and receive feedback and input from fellow colleagues. With the new technology, your drawing experience will be accelerated, especially when creating documents. Drawings as Sets and Collections (video: 2:15 min.): It's now easier to generate sets and collections based on your drawing elements
